Re: Reclamation to Reduce Acreage Completed, Northern Stone Supply, Inc., Limelight Green,
S/003/012, Box Elder County, Utah

Dear Mr. Mullard:

This letter is to document that the reclamation and reseeding of disturbance which exceeded the approved five acre limit of a small mining operation, has been accomplished at the Limelight Green site. In April, 2000, you were notified that this operation had exceeded the five acre limitation for surface disturbance. You were informed that steps had to be taken to resolve this situation or you could be issued a Notice of Non-Compliance. You determined that rather than posting a reclamation surety and submitting a large mining notice you would reclaim the site back down to five acres in order to keep the site under the small mining category.

On August 1, 2000, a site inspection was performed and found that the reclamation work was accomplished, but it would be best to wait to reseed until late October. I have confirmed that the seeding has now been accomplished and, therefore, the site remains under the status of a small mining operation at 4.3 acres.

It is requested that you mark the five acre boundary with metal t-posts or other marking of equal effectiveness in order that you do not exceed the approved boundary in the future.

Thank you for your cooperation. When in the area, I will stop by to check on the revegetation success.

Sincerely,

Lynn Kunzler
Senior Reclamation Specialist
